

1.4. Write a PHP program to print current month using if..else& switch case.

progeam4

```
<?php
```

```
$monthNum = date('M'); // Gets current month as a three-letter abbreviation (e.g., "Jan", "Feb",  
etc.)
```

```
if ($monthNum == "jan") echo "January";  
elseif ($monthNum == "feb") echo "February";  
elseif ($monthNum == "mar") echo "March";  
elseif ($monthNum == "apr") echo "April";  
elseif ($monthNum == "may") echo "May";  
elseif ($monthNum == "Jun") echo "June";  
elseif ($monthNum == "july") echo "July";  
elseif ($monthNum == "aug") echo "August";  
elseif ($monthNum == "sep") echo "September";  
elseif ($monthNum == "oct") echo "October";  
elseif ($monthNum == "nov") echo "November";  
else echo "December";
```

```
?>
```

output

june

1.5 Write a PHP program to print 5 to 10 using For and For Each.

program5

```
<?php
echo "<br><br>Using Foreach Loop:<br>";

$numbers = array(5, 6, 7, 8, 9, 10);

foreach ($numbers as $value) {
    echo "$value ";
}

?>
```

output

Using Foreach Loop:

5 6 7 8 9 10

1.6 Write a PHP program to print 15 to 20 using While and Do While.

program6

```
<?php
echo "<br><br>using do-while loop:<br>";

$j = 15;

do {
```

```
    echo "$j ";  
    $j++;  
} while ($j <= 20);  
?>
```

output

using do-while loop:

15 16 17 18 19 20
